

DEEP is used to receive real-time depth of book quotations direct from IEX. The depth of book quotations received via DEEP provide an aggregated size of resting displayed orders at a price and side, and do not indicate the size or number of individual orders at any price level. Non-displayed orders and non-displayed portions of reserve orders are not represented in DEEP.

Data Bundle: [Equities Market Data](#) → [Buy Bundle](#) (requires [IEX Cloud account](#))

Dataset ID: IEX_DEEP

Update Schedule *: 9:30-4pm ET M-F during regular market hours

- GET /data/core/iex_deep/:symbol

You can execute the following example requests after applying a valid [token](#) (click [Apply Token](#) above and [enter your token](#)).

- https://api.iex.cloud/v1/data/core/iex_deep/spy?token=<your_token>
- https://api.iex.cloud/v1/data/core/iex_deep/aapl?token=<your_token>
- https://api.iex.cloud/v1/data/core/iex_deep/amzn?token=<your_token>
- https://api.iex.cloud/v1/data/core/iex_deep/T,TMUS?token=<your_token>

Path Parameters

```
GET /data/CORE/IEX_DEEP/SPY
```

```
